QAD Partner Eagle Consulting Announces Automated Data Collection (ADC) App for iPhone, iPad and iPod Touch

*Eagle customers using **RF Express™ for QAD Enterprise Applications**
can now use iPad®, iPhone® and iPod Touch®
side by side with traditional RF bar code scanners*

Kinnelon, NJ (Private Distribution) November 15, 2011 — Eagle has been a strategic partner of enterprise software giant QAD since 1992. Today, 800+ customers around the world have chosen Eagle's product, RF Express™ for QAD Enterprise Applications, to meet their automated data collection and bar coding needs.

According to Bill Paone, Eagle's Executive VP of Sales and Marketing, the company now provides an additional tool to its customers in the form of an app known as **iRF Express for QAD**. Once downloaded to an iPad, iPhone or iPod Touch, this app enables the iDevice* to perform the same transactions as other authorized ADC devices. **iRF Express for QAD** can do so both on the local network and on a 3G/4G cellular network on capable devices.

Additional benefits to the use of an iDevice*:

1. **iRF Express for QAD** can operate in an on-premise or on-demand environment, transmitting data to QAD and receiving validation.
2. In an on-demand environment, **iRF Express for QAD** can continue to operate even if local power and/or connectivity is lost. The iDevice* can leverage the 3G/4G network until connectivity is once again available.
3. Authorized users can connect remotely by means of the 3G or 4G network.
4. **iRF Express for QAD** maintains barcode scanning capability with the integrated iDevice imager or available Bluetooth scanner.

##

About Eagle

Eagle Consulting & Development is the leading provider of portable wireless technology solutions for users of QAD Enterprise Applications worldwide. Eagle's product, RF Express™ for QAD Enterprise Applications, provides functionality for fault-proof, real-time automated data collection and bar coding at the single site or multinational level enabling manufacturers to achieve their data accuracy, inventory accuracy, labor cost and efficiency goals.
