

## Autumn Newsletter 2020

It's been a challenging year, with a lot of learning for many of us. So, with that in mind here is our Autumn summary to show you what we've been up to this year. Be sure to follow our company [LinkedIn](#) page to keep up to date. As we've been so busy this year, we have lots of news to share with you, watch out for some more updates over the coming weeks!

Please get in touch if you have any questions, we'd be happy to help.

### **Production Orders**

With the full range of Eagle production order transactions already available, Eagle has maintained the key streamlining/prompt reduction, error-proofing, and enhanced functions customers expect. Some highlights include:

- The Operation Activity Transaction (OAT) provides quantity tracking through operations with backflush component relief and parent item creation.
- The Production Order Component Issue has been enhanced to provide auto operation detection logic.
- The Production Order Receipt transaction has been updated with advanced close and labeling features.

---

### **Christmas Support Hours**

If you have a major project you're working on and will need support over the Christmas period, please notify us to pre-book any required or anticipated support.

### **Did you watch our latest webinar?**

We hosted a webinar earlier this year, all about Delivering Complex Data Collection projects. Catch up using the button below if you missed the session.

## Hardware Update

As always technology is evolving, and our hardware partners Honeywell and Zebra Technologies have a variety of new offerings to help you. Keep an eye out for our Hardware update coming to you shortly, for more information on the latest and greatest devices.

- The Honeywell CK3X/CK75 Windows handheld now has a product retirement notice and expected to go out of stock during 4Q2020/1Q2021. The CK3X/CK75 end of service is 3/31/**2025** so Honeywell will support for quite some time.

---

## New software features/enhancements

### Purchase Order Receipt

- POR-enhanced use of 2D single-scan barcode to receive (gets receipt down to 1 scan)
- POR-CTP Continuous Transaction Processor support

### Unplanned Issue/Receipt

- UNI/UNR-additional configurable transaction remarks posting

### Production Order Reporting transactions

- OAT, BKF, WOR - new label variables to include transaction history and operation history numbers
- Pallet issue to a cumulative/scheduled order backflush

**Keep an eye out for our full list of new software features and enhancements.**

---

## New QAD/Eagle Implementation Update

Even with the extra challenges this year we've been able to deliver projects on-time and on budget. The highlights of the last six months include a range of verticals; Life Sciences, Automotive, Food and Beverage and Industrial Products. From major Android deployment, implementation of Continuous Transaction Processor and QAD Adaptive Cloud ERP projects, we've had a busy, yet exciting year.

If you've got a project in mind and would like to hear about how our other customers tackled similar projects, please get in touch

---

**We would like to remind our customers that Eagle is here to support you and your business. Your success is *our* success, so we are continuously improving and expanding the Eagle solution. Please contact us at any time.**

Thank you,  
The Eagle Europe Team
